

MINGYI MACHINERY

CONSTRUCTION & AGRICULTURAL MACHINERY MANUFACTURER

A reliable Chinese source factory building wheel loaders, mini excavators, tractors and a full range of construction equipment — engineered for stability, built to last, and delivered to more than 80 countries.

COMPANY PROFILE 2026
BUILT FOR THE WORLD MARKET

WHO WE ARE

A source factory you can build your business on.

Mingyi Machinery Co., Ltd. develops, manufactures and exports construction and agricultural machinery from our own facilities in Shandong, China. We serve contractors, farmers, dealers and brand owners across Europe, the Americas and worldwide with equipment that is dependable, easy to maintain and genuinely good value.

20+
Years of machinery manufacturing experience

80+
Countries and regions served worldwide

12
Core product lines, construction & agriculture

ISO 9001
Certified quality management system

From a single compact machine to a full dealer fleet, every unit is built around the same promise: **stable performance, simple maintenance, factory-direct value.**

OUR PHILOSOPHY

Three principles behind every machine.

We don't chase complexity for its own sake. We build equipment that works hard, keeps running in demanding conditions and protects your bottom line over years of service.

Reliable by Design

Proven hydraulic matching and high-strength structures deliver consistent performance under heavy, continuous workloads.

Easy to Maintain

Simple, accessible design, common components and clear guidance keep servicing fast and downtime to a minimum.

High Long-Term Value

Sensible configuration, reasonable fuel use and durable build give owners a strong return on every machine.

WHY MINGYI

The reasons customers stay with us.

01 **Precision Machining & QC**

Key structural parts are produced on CNC equipment and pass multiple inspection stages for accurate assembly and long-term stability.

02 **Core Component Capability**

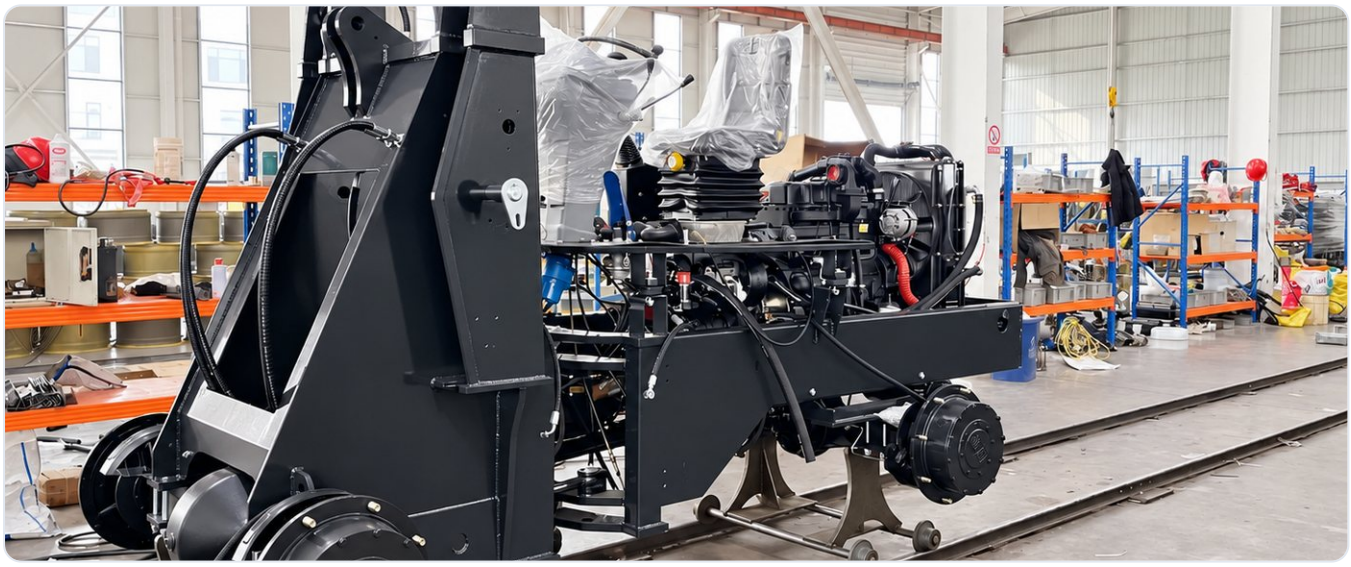

Critical parts are made in-house or sourced from long-established, leading suppliers to ensure durability and consistency.

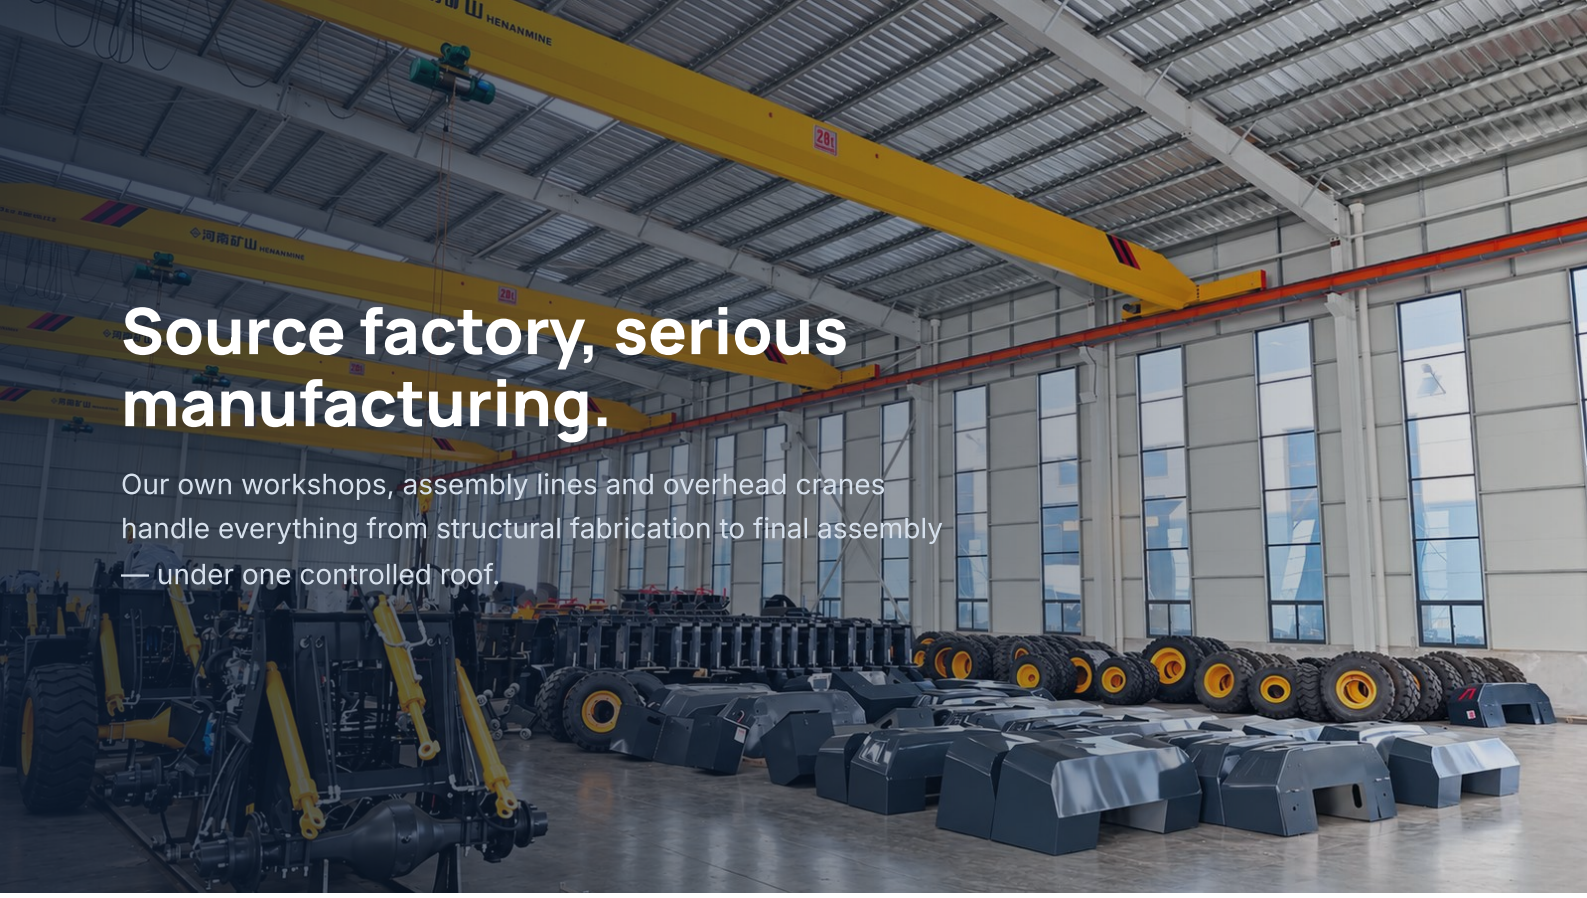

03 **Remote Support & Guidance**

We provide remote technical support, operator guidance and troubleshooting advice that lower your risk of downtime.

04 **Return on Investment**

Balanced configuration, stable performance and easy maintenance reduce fuel and service costs over the life of the machine.

Source factory, serious manufacturing.

Our own workshops, assembly lines and overhead cranes handle everything from structural fabrication to final assembly — under one controlled roof.

Own Workshops & Lines

Dedicated production bays and assembly lines give us direct control over quality and lead times.

In-House Structural Parts

Frames, buckets, booms and chassis are fabricated in-house for strength and consistency.

ISO 9001 System

Every stage follows a disciplined, ISO 9001-aligned quality management process.

INSIDE THE PLANT

From raw structure to finished machine.

Structural Frames

Welded and machined in-house for heavy loads.

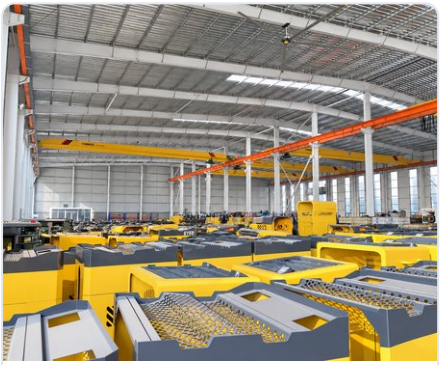

Power Units

Proven engines and drivetrain components.

Chassis Build

Rolling chassis assembled on the line.

Body & Canopy

Finished bodies prepared for assembly.

Final Assembly

Hydraulics, cab and powertrain fitted.

Export Loading

Secured and shipped worldwide by container.

Vertical integration matters. Because we fabricate the structures and control the assembly, we can **customize configurations, hold consistent quality** and meet dealer order schedules with confidence.

QUALITY & COMPLIANCE

Built to international standards.

We understand the regulatory requirements of overseas markets. Our machines are engineered and documented to support the certifications your market demands.

ISO 9001	CE Marking	EPA	EURO V	SGS / TUV
Quality management	European compliance	U.S. emissions ready	European emissions	International inspection

OUR QUALITY CONTROL PROCESS

1	2	3	4	5
Incoming Check	**Machining**	**Assembly**	**Testing**	**Pre-Shipment**
Materials & parts verified	CNC fabrication & welding	Powertrain & hydraulics	Load & function trials	Final inspection & crating

PRODUCT RANGE

One partner, twelve product lines.

A complete portfolio covering construction, agriculture, hauling and material handling — all built around stability, durability and easy service.

Mini Excavators

Wheel Loaders

Backhoe Wheel Tractors

4WD Site Dumpers

Crawler Tractors

Crawler Dump Carriers

Diesel Tricycles

Skid Steer Loaders

Rough Terrain Forklifts

Backhoe Loaders

Front Dumpers

Self-Loading Mixers

EARTHMOVING

PRODUCT 01

Mini Excavators

KEY FEATURES

- Compact footprint for tight access and confined job sites
- Smooth, responsive hydraulic controls — easy for new operators
- Low ground pressure rubber tracks protect finished surfaces
- Wide range of buckets and attachments available

IDEAL FOR

Municipal Works | Landscaping | Orchards | Farm Duties | Foundations | Indoor Demolition

From courtyard builds to orchard trenching, these machines dig, grade and load where larger equipment simply can't reach.

MATERIAL HANDLING

PRODUCT 02

Wheel Loaders

KEY FEATURES

- Strong breakout force and high lifting capacity
- Robust, well-matched hydraulic system for steady cycles
- Heavy-duty axles and tyres built for daily hard work
- Comfortable, low-noise cab with clear visibility

IDEAL FOR

Construction | Quarries | Stockyards | Logistics | Farms | Snow Clearing

The workhorse of the fleet — built to load, carry and stockpile shift after shift.

AGRICULTURE

PRODUCT 03

Backhoe Wheel Tractors

KEY FEATURES

- Front loader or dozer blade plus rear backhoe
- Standard three-point hitch with quick-attach system
- Compatible with dozens of agricultural implements
- ROPS protection frame meeting global safety norms

IDEAL FOR

Farming | Hauling | Tillage | Loading | Land Management

Switch implements in minutes and handle field work, transport and digging with a single versatile machine.

4WD Site Dumpers

KEY FEATURES

- Four-wheel drive with strong gradeability and traction
- Compact body works well in narrow, confined sites
- Body size and configuration built to order
- Simple, dependable design with low running costs

AVAILABLE CONFIGURATIONS

Tipper Bed | Water Tanker | Grapple Crane | Sprinkler | Flatbed

A practical, high-stability hauler engineered for heavy loads on unimproved ground.

AGRICULTURE

PRODUCT 05

Crawler Tractors

KEY FEATURES

- Tracked undercarriage with low centre of gravity
- Strong ground adhesion on hills and mountain terrain
- Built for heavy-duty tillage and rotary cultivation
- Multiple front and rear implements supported

IDEAL FOR

Hillsides | Orchards | Greenhouses | Heavy Tillage | Trenching

Where wheeled machines slip, the crawler tractor holds its ground — safely and productively.

SPECIALIST HAULAGE

PRODUCT 06

Crawler Dump Carriers

KEY FEATURES

- Wide tracks float over soft, muddy ground with minimal damage
- Hydraulic self-tipping bed for fast unloading
- Dual-pump hydraulics keep travel and tipping independent
- Sealed, waterproof wiring for wet environments

IDEAL FOR

Swamps · Riverbanks · Paddy Fields · Rainforest · Snow & Ice · Slopes

VERIFIED SPECIFICATIONS		CE · EPA · EURO 5	
Model 500 — payload	500 kg	**Model 1000 — payload**	1000 kg
Engine / power	6.5 HP gasoline	**Engine / power**	19.5 HP gasoline
Machine weight	410 kg	**Machine weight**	690 kg

Diesel Tricycles

KEY FEATURES

- Reliable diesel power with strong torque
- High load capacity over rough roads
- Hydraulic tipping for easy unloading
- Straightforward design, low cost of ownership

IDEAL FOR

Farm Transport | Site Support | Material Hauling | Rural Logistics

Export-ready with CKD/SKD packaging, English manuals and assembly video to save freight and simplify setup.

MULTI-TASK

PRODUCT 08

Skid Steer Loaders

COMPACT POWERHOUSE

KEY FEATURES

- Ultra-compact for tight spaces and high-frequency work
- Skid steering turns within its own length
- Wheeled (S) and tracked (T) versions available
- Huge selection of quick-attach work tools

MODEL RANGE

360S · 360T · 480S · 480T · HHX1200 · XRD1000 PLUS

A versatile performer across construction, municipal work, agriculture and landscaping.

480T HIGHLIGHTS	CE · EPA · EURO 5
Rated operating load	300 kg (max 400 kg)
Engine / power	Twin-cylinder, 15–18 kW
Operating weight	1,200 kg

Rough Terrain Forklifts

KEY FEATURES

- Four-wheel drive for unpaved and uneven ground
- Large lug tyres with excellent traction
- Stable, high-capacity mast for outdoor loads
- Enclosed cab option for operator comfort

IDEAL FOR

Construction Sites | Farms | Lumber Yards | Mining | Emergency Work

Lift and move heavy materials confidently where ordinary forklifts cannot go.

MULTI-FUNCTION

PRODUCT 10

Backhoe Loaders

KEY FEATURES

- Front loader and rear excavator on one chassis
- Stabiliser legs for secure digging
- Switch between tasks without changing machines
- Compact, manoeuvrable and operator-friendly

IDEAL FOR

Municipal Works | Construction | Utilities | Road Work | Farming

A single "two-in-one" solution that boosts utilisation while reducing fleet cost.

SITE HAULAGE

PRODUCT 11

Front Dumpers

KEY FEATURES

- Front-mounted tipping hopper for easy discharge
- Compact dimensions for confined work areas
- Hydraulic tipping (FC-10 / FC-18 models)
- Simple controls, quick to learn and operate

IDEAL FOR

Construction | Municipal Works | Agriculture | Short-Haul Transfer

Manoeuvrable and efficient for moving materials short distances around busy sites.

Self-Loading Concrete Mixers

KEY FEATURES

- Integrated loading, mixing and short-haul transport
- Front self-loading bucket feeds the drum
- Four-wheel drive for rough, muddy job sites
- No batching plant required — mix right on site

IDEAL FOR

Rural House Building | Yard Floors | Farm Facilities | Canal & Slope Work | Small Projects

A flexible, cost-effective on-site mixing solution with a compact 0.8 m³ drum option.

APPLICATIONS

Built for the way you work.

Our machines are designed around real working conditions across four core sectors.

Heavy-duty performance for buildings, foundations, infrastructure and earthworks — machines that keep up with demanding project schedules.

Efficient tractors, carriers and loaders for tillage, planting, harvesting and land management across all types of terrain.

Loaders, forklifts and grapples for loading, stacking and moving bulk materials, logs, feed and stock around the clock.

Compact, versatile equipment for utilities, road work, site hauling and maintenance in both urban and remote settings.

OEM / ODM & GLOBAL EXPORT

Tailored to your market and your brand.

Color, Configuration & Brand Customization

Match your livery, choose the configuration and build under your own brand.

Dealer & Brand-Owner Partnerships

Long-term support for overseas distributors and equipment brands.

Market-Specific Technical Tuning

Parameters and emissions packages adjusted for the target market, with CE / EPA / EURO support.

Worldwide Shipping & Documentation

Container loading, CKD/SKD packing, English manuals and clear export paperwork.

With equipment delivered to 80+ countries, we know the standards, documentation and communication that international buyers expect.

CLIENT VOICES

Trusted by partners worldwide.

"The equipment performs very steadily under high-intensity work. The structure is solid and maintenance is straightforward — a real advantage for a construction team running continuous operations."

DM

David Müller
Construction Contractor

"As a dealer, we care most about product consistency and reliable supply. Mingyi is highly professional in delivery, configuration support and communication — ideal for a long-term partnership."

ER

Elena Rossini
CEO, Equipment Distributor

"From a practical standpoint, these machines balance performance and cost control. They're simple to operate, fuel use is reasonable, and the overall experience matches our expectations."

AH

Ahmed Hassan
End User

GET IN TOUCH

Let’s build something that lasts.

Tell us about your market and the equipment you need. Our sales and engineering team will respond within 24 hours with model advice, configuration options, pricing and lead time.
